Report Ref: 23_05_EN233295_JS_01

13th June 2023

Water Testing – Manvers Lake

Two samples were taken from Manvers Lake, on behalf of Manvers Waterfront Boatclub, on the 31st May 2023. The samples were submitted to SOCOTECs UKAS Accredited Microbiological Laboratory for analysis to determine Coliforms, E.Coli and Faecal (Intestinal) Enterococci.

The Analytical results were then compared against the Bathing Water Regulations 2013, based on the EC Bathing Water Directive 2006/7/EC. The limits, for both of these, are normally used for water that is tested on a regular basis, building up a statistical analysis over a number of samples, however the guidance values, illustrated below are still considered most appropriate for one-off or occasional testing.

Legislation	Quality Level	Coliforms cfu/100ml	E.Coli cfu/100ml	Faecal Enterococci cfu/100ml
Inland Water Limits <i>The Bathing Water Regulations 2013</i> <i>EC Bathing Water Directive 2006/7/EC</i>	Excellent	-	< 500	< 200
	Good	-	< 1000	< 400
	Sufficient*	-	< 900	< 330
	Poor (Fail)	-	> 900	> 330

* The anomaly in limits between Good and Sufficient is based on a statistical measure of all samples, known as percentiles.

The results are given in the table below:

Date Sampled	Sample No	Sample Description	Confirmed Coliforms cfu/100ml	Confirmed E.Coli cfu/100ml	Presumptive Faecal Enterococci cfu/100ml
31/05/23	23_05_EN233295/01	Jetty Edge	20	12	9
	23_05_EN233292/02	Headland	20	12	24

The results of the sample analysed fall comfortably within the 'Excellent' band when compared against *'the Bathing Water Regulations 2013 and EC Bathing Water Directive 2006/7/EC for Inland Waters'*.

If you require any further information or assistance please do not hesitate to contact me.

Yours sincerely,

Jack Saddington BSc (Hons)
